

Components: solution of alkali metals, solution of platinum group catalysts, isopropyl alcohol, organic additive, peroxodibenzol, surfactants, high purity aromatic hydrocarbons.

Safety measures: H302 + H312 - Harmful if swallowed, in contact with skin. P102 - Keep out of the reach of children. P211 - Do not spray on a naked flame or any incandescent material. P262 - Avoid contact with eyes, skin or clothing. P301 + P312 - If swallowed: immediately call a toxicology center or doctor if you feel unwell. P302 + P352 - In case of skin contact: wash thoroughly with soap and water. P305 + P351 + P338 - In case of contact with eyes: rinse thoroughly with water for several minutes. Remove contact lenses, if present and easy to do. Keep rinsing. P410 + P412 - Protect from direct sunlight. Do not expose to temperatures exceeding 50 °C / 122 ° F. P313 - Get medical advice / attention if you feel unwell.

REactive 8000

PRO-ACTIVE

NANO ADDITIVE

REACTIVATE YOUR CAR

REACTIVE 8000 «PRO-ACTIVE» fuel additive improves the quality, activates and ensures complete combustion of fuel, maintains the good condition of the catalytic converter, DPF filter and lambda sensor.

PRO-ACTIVE is effective, safe and suitable for all types of fuel - diesel, gasoline or liquid gas.

BENEFITS OF USING THE PRODUCT

Using the **REACTIVE 8000 «PRO-ACTIVE»** allows you to achieve the following effects:

- ✓ increase engine power output;
- ✓ reduce the formation of soot, significantly reduce the levels of CO/CH in exhaust gases, reduce smoke;
- ✓ significantly reduce fuel consumption;
- ✓ reduce wear in the friction units of the fuel system, extend the life of the units;
- ✓ improve the flammability of the fuel mixture and ensure cold engine start, especially at low temperatures;
- ✓ lubricate, protect and keep the fuel injectors and combustion chamber clean;
- ✓ clean and increase the resource of the DPF filter and catalyst;
- ✓ protect against the consequences of using low-quality fuel;
- ✓ remove moisture and condensation in the tank and prevent corrosion processes;
- ✓ extend the service life of turbochargers due to less soot and other contaminants entering the turbine.

The additive is safe for fuel system and injectors and is specially balanced for continuous use.

Volume: 150ml (3 bottles of 50 ml). Each bottle (50 ml) is used for 50-60 liters of fuel.

INSTRUCTIONS

REACTIVE 8000 «PRO-ACTIVE» is intended to activate petrol, diesel or gas and is used when filling the fuel tank.

1. **Shake the bottle well** (until a homogeneous state of the mixture).
2. Pour the required amount of additive (50 ml for 50-60 liters of fuel or 25 ml for 25-30 liters) into the fuel filler neck or the gas charging adapter, and then fill the tank.
3. Use the car as usual.

It is recommended to use it at every refueling to protect against sulfur compounds, water, vanadium and harmful additives contained in the fuel.

DO NOT USE FOR METHANE!
